Dear Mam,

Our company, **Cinema & kultura Primera Nterprises**, aims to promote Indie and science related films. And through this, we empower students with educational but value-oriented movies that stimulate intellectual, social issues and would influence them subliminally about family values and morals

Since values and morality are steadily declining these past years and unfortunately our children are greatly affected for they suffer most, the said films are effective ways in alleviating standards that has been declining for the past generation. In this connection, we encourage children and parents of Angeles to view such quality movie that will help uplift principles and to revitalize family bonding

In line with this, **CKPN Enterprises** is asking your good office to permit us to host over a full-length movies entitled, **EARTH TO ECHO M. (Mother's maiden name)** at SM Clark on "September- December 2015. This said event is a purely voluntary basis only.

Such consideration will be highly appreciated.

Synopsis:

After a construction project begins in their neighborhood, best friends Tuck (Brian "Astro" Bradley), Alex (Teo Halm) and Munch (Reese C. Hartwig) begin receiving strange, encoded messages on their cell phones. They immediately inform their parents and the authorities, but when no one takes them seriously, the youths decide to crack the code themselves and trace the messages to their source. The youths' curiosity leads them to a robotic extraterrestrial who desperately needs their help.
