Schools Division Superintendent

June 28, 2018

**Leilani S. Cunanan, CESO VI**  
**Schools Division Superintendent**  
**Angeles City**

Dear Ms. Cunanan;

Warm Greetings

Technology and education can go hand in hand, it's just with the world moving so fast education hasn't been able to keep up. Children have phones, tablets and computers of their own in their family home – but these instruments are sorely lacking in education. When pupils are used to fast information being available and using these devices in their daily lives, formal education can seem dull and backwards in comparison. .

Now D' Creative Adventures Inc. Yet to introduce 3D in Motion a new mobile exhibit that incorporate 3D technology as a tool in teaching our young learners. This teaching tool will enhance their ability in comprehending, scaling, surface area, volume, space geometry and other lessons that have previously been considered difficult. We have specially crafted 3 modules that will surely make our learners participate and be more active in their school subjects.

Modules that complement K12 program:

- **3D Film** – A fascinating HD film showing that educate as effectively as they entertain. All our film documentaries (chosen for viewing) cater to all ages and allow its viewers to experience new worlds with mind boggling details and superb sound. It is shown in a three-dimensional stereoscopic film that enhances the illusion of depth perception, hence adding a third dimension. Plus adding a surround sound system back up by Dolby. Thus, enhancing educational experience to a new level! Also, we provide a comprehensive supplemental material for teachers by request that allow the learning to continue beyond the exhibition. (45min)
- **Interactive Fascinating Images and Eye Wonder Activities** – Human have two seeing eyes equals to two views! Two eyes' view used and fused in the Brain equals STEREO VISION! Be fascinated with this Interactive Images with a Fun Exercise and experiment that demonstrate wonders of the human eyes. This will give a learning experience that enhances physical senses and understanding of the subject matter. In which you can learn about an exciting part of normal human vision, the Stereo Vision. A vision which benefits careers like Dentist, Architects, Surgeon and many more. (20min)
- **3D Interactive Gadgets** – an array of manipulative gadgets that demonstrate 3D technology that surely give students the inspiration on the subject matter.(20min)

We look forward on giving our young learners the experience and the inspiration of 3D education and preparing for the future with D'Creative Adventures *3D in Motion*. Our company has been dedicated in providing our youth with different learning perspective not only to enhance their abilities but also to give knowledge and entertainment as well. This has been our company's goal for the past 11 years.
