Event Descriptions

National Science Club Month 2018

September is considered the **National Science Club Month (NSCM)** under Presidential Proclamation No. 264. During the NSCM, the **Philippine Society of Youth Science Clubs (PSYSC)** conducts activities that encourage the youth to actively participate in the science clubbing movement. Through these activities, PSYSC aims to provide a venue for the interaction of science clubs and to recognize excellence through workshops and friendly competitions. The four (4) main events that will kick-off this year's NSCM are the National Science Clubs Summit (Summit), PSYSC Science Olympiad (PSO), I Teach Science Seminar (ITSS) and Mathematics, Science at Kapaligiran interactive Workshop (MathSciAKa).

The **National Science Clubs Summit (SUMMIT)** is a one and a half-day gathering of high school science club affiliates, conducted simultaneously in different regions. The event is an opportunity for the different science clubs to learn from lectures, workshops, and plenary session. The SUMMIT brings the camp experience closer to our affiliates who are not able to attend the National Youth Science Technology and Environment Summer Camp (NYSTESC). Exciting trademark activities of SUMMIT include Sub-camp Quiz Competition and fun-filled Science workshops. SUMMIT also offers the chance to experience MathSciAKA, an event which provides set of interactive workshops.

The **Philippine Society of Youth Science Club Science Olympiad (PSO)** is an inter-school quiz competition for elementary and high school students all over the country. This Olympiad consists of two rounds: (1) the National Eliminations, conducted simultaneously in different regions, which will be a written exam that will challenge the students' knowledge on various science categories, and (2) the National Finals, which will be composed of theoretical and practical rounds. Prizes would include cash, plaques, medals and certificates.

The **I Teach Science Seminar (ITSS)** is a two-day activity catering to science teachers of affiliated schools. It is an enrichment seminar packed with lectures, workshops, and discussions for teachers featuring ways on how they can make science teaching fun and interactive. This is PSYSC's way of thanking the teachers for the service they bring to the youth and as well as to the organization.

MathSciAKa is an event composed of many different science workshops known as the Mathematics, Science, At Kapaligiran (MathSciAKa). MathSciAKa has been designed to challenge both the physical and mental capabilities of participating science clubbers. It is usually celebrated on two separate dates – every 1st week of September during the NSCM-SUMMIT which features two sub events: the Engineering Science Challenge and the Interactive Workshop; and every 3rd week of September within the National Capital Region during the MathSciAKa Proper consisting five sub events: Interactive Workshop, On-the-spot Workshop, Take Home, Mystery Workshop and the Workshop Fair.
